Project Spotlight:

Future Hillsborough Train Station

In FY23, the Town of Hillsborough continued to progress design and engineering of the future train station and greenway connection.

The current phase of the project includes planning, design and construction document-level engineering of the train station building, a covered platform, parking, site circulation, connectivity to the site and other related and necessary improvements. The train station building is expected to be approximately 7,000 square feet and will provide space for offices and passenger service areas.

The station will primarily be used for town office and meeting space until future expansion and construction of the station's platform. The project will include the development of three concept designs, one of which will be carried through to construction-document level design and engineering estimates.

Project Spotlight:

GoDurham Better Bus Project

Bus Access

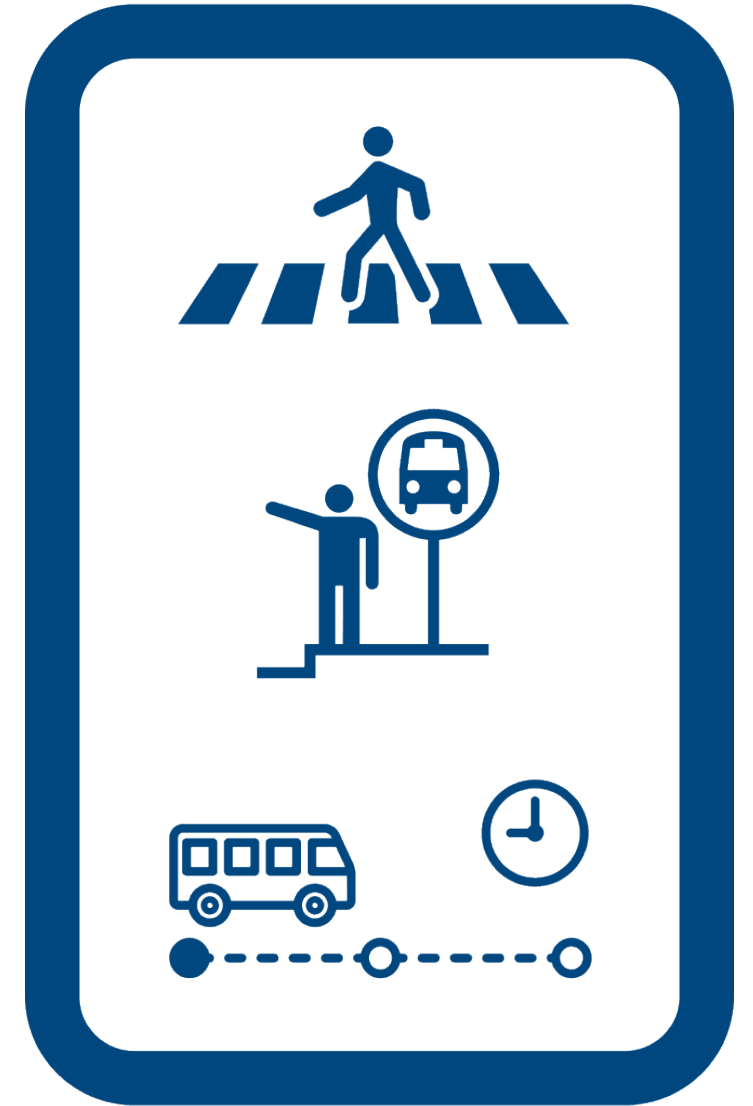

Sidewalks, crosswalks, curb ramps, and other pedestrian improvements that provide better access to bus stops

Bus Stops

Shelters, benches, and other improvements at bus stops that make waiting for the bus more comfortable and convenient

Bus Service

Bus priority projects like changes to traffic signals, pavement markings, and signage that improve bus speed and reliability

Project Spotlight:

New Bern Avenue Bus Rapid Transit
